Internet technologies and protocols have witnessed continued development revolutionizing the way we connect and communicate with others.

MIRC is a popular Internet Relay Chat client used by individuals and organizations to communicate, share, play and work with each other on IRC networks around the world.. I'm paying a few £, an amount I could lose down the back of the sofa and not notice, for a piece of software that works and looks the way I want it to, that someone has put hundreds of hours of time into developing it, a piece of software that I use every day for hours at a time, all for the price of a coffee or two.. It simply connects you to a global network of IRC servers and enables one-on-one and group communication.
